## 1.0 PREAMBLE

### 1.1 Introduction

The Economic History syllabus covers the first four years of Secondary education. It provides learners with an understanding of production, consumption, and exchange of goods and services in the pre-colonial, colonial and post-colonial periods. It also assesses economic developments and their impact on Zimbabwean society. The syllabus fosters an understanding and appreciation of economic indigenisation, empowerment, gender sensitivity, democratisation of resources including Unhu/Ubuntu/Vumunhu(societal norms and values) and instils patriotism. It enables learners to acquire an informed and critical understanding of economic dynamics as they develop the nation. The syllabus promotes in learners the realisation that resources in Zimbabwe are for all Zimbabweans. In addition, the syllabus raises an awareness of the need to sustainably utilise and conserve our economic heritage.

### 1.2 Rationale

This syllabus focuses on economic developments from the pre-colonial era to post-colonial Zimbabwe within the context of economic development in the international community. It is concerned with the ways and means by which a society gains its subsistence, organises its industries, trades, financial institutions, communications, conditions of labour, resource exploitation and consumption, land tenure systems and methods of agriculture. The study of Economic History seeks to produce a learner who is pro-active, productive, adds value to the community and is endowed with important life skills like conflict resolution, creative business and vocation as well as an analysis of past and contemporary economic developments. In addition, the syllabus promotes in learners the importance of protecting the national economic heritage and sovereignty of Zimbabwe, as well as the need for a harmonious economic relationship with the wider world. It responds to the need for skills development, economic empowerment, responsible citizenship, Unhu/Ubuntu/Vumunhu (societal norms and values) and patriotism. The methodologies employed in this syllabus are inclusive and learner-centred.

### 1.3 Summary of Content

The syllabus covers the historical development of Zimbabwe's economic systems and their evolution from the early economic models to the colonial and post-colonial eras. It conceptualises economic history and looks at the development of capitalism, economic domination and industrialisation from pre-colonial to present Zimbabwe. It ensures sustenance of the country's economic heritage through an appreciation of the struggle for economic emancipation. The syllabus enables learners to draw lessons from the transforming economic models and environments through different times, places and societies.

The Economic History syllabus enables learners to develop skills in:

- Resource management
- Heritage preservation
- Enterprise
- Problem solving
- Critical thinking
- Technology and innovation
- Decision making
- Conflict resolution
- Leadership
- Self-management
- Communication

### 1.4 Assumptions

It is assumed that learners:

- Are aware of what constitutes wealth
- Are aware of some economic modes of production
- Are aware of land as a means of production
- Are aware of various types of minerals available in the country
- Come from economically active communities
- Have general knowledge about the causes of colonisation
- Have general knowledge of the armed struggle
- Have knowledge of various forms of craft work
- Have some communication skills
- Are aware of folklores

### 1.5 Cross-cutting themes

- Gender
- Children's rights and Responsibilities

## 2.0 PRESENTATION OF SYLLABUS

The Economic History Syllabus is presented as a single document which covers Forms 1 – 4.

- examine ways of managing natural resources for sustainable economic development
- participate in local and national economic events
- explain economic policies in Zimbabwe since the pre-colonial era
- compare the different means and modes of production in Zimbabwe and other countries
- assess the impact of the First and Second Chimurenga/Umvukela on Zimbabwe's economic development
- explain how Zimbabwe's membership in regional economic blocs and international financial organisations has impacted on economic development
- demonstrate the concept of Unhu/Ubuntu/Vumunhu in economic development in Zimbabwe
- use ICT in the study of Economic History

## 3.0 AIMS

The syllabus enables learners to:

- develop an interest in, and enthusiasm for, the study of Economic History
- develop appropriate skills and tools of analysing and providing solutions to economic dynamics
- understand how colonisation and resistance to it have influenced economic relations between Zimbabwe and other nations
- appreciate patriotism, economic indigenisation and empowerment through visiting historical sites as well as involvement in local and national economic events such as Agricultural Shows, Trade Fairs, Field Days and Exhibitions
- create an awareness of how class differences have produced conflicts
- nurture Unhu/Ubuntu/Vumunhu (societal norms and values) through participation in various economic activities
- understand the importance of sustainable resource management on the country's economic development
- assess the role of international institutions in the Zimbabwe economy

## 4.0 SYLLABUS OBJECTIVES

By the end of Form 4 learners should be able to:

- define the term Economic History
- explain concepts of Economic History
- demonstrate enterprise skills to improve the quality of life of individuals, families and the nation

## 5.0 METHODOLOGY AND TIME ALLOCATION

The teaching of Economic History will be accomplished through the use of the following learner-centred and multi-sensory approaches

### Methodology

- Research
- Project
- Debate
- Work-related learning
- Educational tours
- Case study
- Group discussions
- Discovery
- E-learning
- Gallery walk
- Exhibitions
- Observations
- Drama, song and poetry
- Games and Quizzes
- Modelling and drawing
- Video and film shows
- Role play
