## ACKNOWLEDGEMENTS

---

The Ministry of Primary and Secondary Education wishes to acknowledge the following for their valid contribution in the production of this Syllabus:

- The National Information Communication and Technology (ICT) Syllabus Panel
- Representatives from Universities, Technical and Teachers Colleges
- Zimbabwe School Examinations Council (ZIMSEC)
- Representatives of Book Publishers
- United Nations Children's Fund (UNICEF)
- United Nations Educational Scientific and Cultural Organization (UNESCO)

## Information and Communication Technology (ICT)

---

### 1.0 PREAMBLE

#### 1.1 Introduction

The Information and Communication Technology (ICT) syllabus is one of the seven learning areas at Infant level as noted in the Curriculum Framework for Primary and Secondary Education. It provides a broad perspective on the basic knowledge and practical skills on how to use and apply a variety of technologies in everyday life. The syllabus intends to equip learners with the general understanding of how information systems are designed to suit particular applications and how such systems work. The ICT syllabus is intended to be infused within other learning areas in the school curriculum.

The syllabus will follow a developmental approach that will lead learners to grow into a confident relationship with ICTs through education Infant module .

#### 1.2 Rationale

ICT requires learners to pay close attention to developing adequate life and career skills. It adequately equips today's learners in entry-level work and beyond, in further study and lifelong learning, and in their personal lives as inquisitive, reflective, discerning and caring citizens. ICT is significantly enhancing and altering human activities, enabling us to live, work and think in ways that most of us never thought possible. Since technology has an increasingly significant impact, and such broad implications for every individual, groups and entire nations, learners must be prepared to understand, control use and apply ICT in effective and efficient ways.

#### 1.3 Summary of Content

The Infant School ICT syllabus covers theory and practical activities in areas such as drawing, programming and designing. This enables learners to be exposed to a wide variety of ICT tools and programs which develop expertise, originality, confidence, self-identity (*Unhu/Ubuntu/Vumunhu*) and the ability to communicate.

ICT provides unique opportunities for scaffolding and supporting learning for learners with special learning needs, and learners from culturally or linguistically diverse backgrounds. The use of ICT encompasses enterprise skills, a significant contributor to the socio-economic transformation of the nation.

#### 1.4 Assumptions

The syllabus assumes that learners:

- are exposed to some electronic tools at their homes such as smart phones
- are able to manipulate some electronic tools at their homes
- have innate desire to explore the basic elements and principles of design
- have an appreciation of ICT devices
- are confident in dealing with electronic devices
- are persistent in working with difficult problems

## Information and Communication Technology (ICT)

---

### 1.5 Cross Cutting Themes

ICT learning area will encompass and have a universal thrust on the following cross cutting themes:

- Collaboration
- HIV and AIDS
- Heritage Studies
- Human Rights
- Child Protection
- Gender
- Environmental Issues
- Disaster Risk Management

### 2.0 PRESENTATION OF THE SYLLABUS

The syllabus is presented as a single document catering for Infant level.

### 3.0 AIMS

The syllabus aims to enable learners to:

- 3.1 appreciate the role and impact of ICTs, safety and security as they apply to self, work and society
- 3.2 develop an understanding of the operating skills required, be creative and innovative in solving problems through ICTs
- 3.3 acquire enterprise skills using ICTs
- 3.4 infuse ICTs in other subjects across the curriculum
- 3.5 create an awareness of their cultural heritage, its preservation and developmental issues using ICTs

### 4.0 SYLLABUS OBJECTIVES

By the end of the infant school level, learners should be able to:

- 4.1. identify ICT tools in the environment
- 4.2. identify computer packages
- 4.3. create a computer based solution from a given problem statement
- 4.4. operate ICT tools to achieve specific tasks
- 4.5. handle data using ICTs
- 4.6. apply the elements and principles of design
- 4.7. present information in a variety of forms
- 4.8. archive cultural and scientific information using ICTs
- 4.9. infuse ICT into other learning areas
- 4.10. evaluate the effectiveness of computer safety and security

## Information and Communication Technology (ICT)

---

### 5.0 METHODOLOGY AND TIME ALLOCATION

In this syllabus, some of the methods and approaches that can be used to teach Information and Communication Technology in primary schools are as follows:

#### 5.1 Methodology

- Problem Solving
- Games
- Simulation and Modeling
- Discovery and Experimentation
- Design Based Learning
- Project-based Learning (Case Study)
- Question and Answer
- Discussions and Group Work
- Demonstrations
- Educational Tours
- Research and Presentations

**NB: Teachers should be aware of methods and principles that meet the diverse needs of learners that include visual tactile, individualization, self-activity, totality and wholeness.**

#### 5.2 Time Allocation

ECD A should be allocated 2 periods of 15 minutes each per week. ECD B should be allocated 2 periods of 20 minutes each per week. In Grades 1 and 2 the learning area should be allocated at least 1 hour per week per class.

### 6.0 SYLLABUS TOPICS

- 6.1. ICT Tools
- 6.2 Creating and Publishing
- 6.3 Application Software
- 6.4 Safety and Security
- 6.5 Programming

## Information and Communication Technology (ICT)

### 7.0 SCOPE AND SEQUENCE

<b>TOPIC</b>	<b>ECD A</b>	<b>ECD B</b>	<b>GR1</b>	<b>GR2</b>
<b>ICT TOOLS</b>	Computer play ICT toys	Computer play ICT toys	Parts of a computer	Parts of a computer
<b>CREATING AND PUBLISHING</b>	Scribble	Puzzles	Drawing and Colouring	Auto Shapes Digitising information
<b>APPLICATION SOFTWARE</b>	Paint	Drawing	Text Input Word processing	Text Formatting
	Multimedia	Multimedia	Multimedia	Multimedia
<b>SAFETY AND SECURITY</b>	Computer safety rules	Computer safety rules	Formulation of computer safety rules	Computer safety rules
			Computer security	Computer security
			Handling of computers	Health hazards e-waste management
<b>PROGRAMMING</b>	Control	Control	Devices and Commands	Devices and Commands

## COMPETENCY MATRIX ECD A

TOPIC	OBJECTIVES Learners should be able to:	CONTENT/ COMPETENCIES	SUGGESTED ACTIVITIES AND NOTES	SUGGESTED RESOURCES
7.1 <b>ICT TOOLS</b>	• play with available ICT toys	• ICT toys • ICT models	• Naming available ICT toys • Playing with available ICT toys • Creating ICT models using locally available resources	• Toy Laptops • Smart Phones • Remote Controls • Cameras
7.2 <b>CREATING AND PUBLISHING</b>	• scribble using the mouse or touch screen • select colours	• Scribble • Drawing	• Scribbling using selected colours • Drawing using selected colours	• ICT tools • Charts of scribbled work
7.3 <b>APPLICATION SOFTWARE</b>	• select and use different painting tools • paint pictures and shapes	• Painting	• Identifying painting icons such as pencils, brushes and colour icons • Free painting using the mouse or touch screen • Painting pictures and shapes based on Socio-cultural context	• Mouse • Paint Program • Touch screen • Smart boards • Zimbabwean Flag
7.4 <b>SAFETY AND SECURITY</b>	• identify musical toys • play with the musical toys • play using musical software	• Multimedia • Music	• Naming musical toys • Playing music from toys and computer related tools • Conducting educational tours: visiting studios	• Toy Phones • Pianos • Computers • Music Software
7.5 <b>PROGRAMMING</b>	• state computer safety rules	• Basic computer safety rules • Safe computer use	• Discussing computer safety rules • Stating computer safety rules	• Charts showing computer safety rules
	• identify different electronic toys • guide a floor robot	• Control • Robotics	• Exploring a range of control toys and devices • Visiting specific locations using a robot on a floor map.	• Electronic toys with remotes • Homemade robots

## Information and Communication Technology (ICT)

### COMPETENCY MATRIX ECD B

TOPIC	OBJECTIVES Learners should be able to:	CONTENT/ COMPETENCIES	SUGGESTED ACTIVITIES AND NOTES	SUGGESTED RESOURCES
7.6 ICT TOOLS	<ul style="list-style-type: none"> <li>• operate available ICT toys</li> </ul>	<ul style="list-style-type: none"> <li>• ICT toys</li> </ul>	<ul style="list-style-type: none"> <li>• Naming and playing with available ICT toys</li> </ul>	<ul style="list-style-type: none"> <li>• Toy laptops</li> <li>• Phones</li> <li>• Remote controls</li> <li>• Cameras</li> </ul>
7.7 CREATING AND PUBLISHING	<ul style="list-style-type: none"> <li>• name computer parts</li> <li>• switch on and off the computer</li> <li>• manipulate the computer mouse</li> </ul>	<ul style="list-style-type: none"> <li>• Parts of a computer</li> <li>-Computer Play</li> </ul>	<ul style="list-style-type: none"> <li>• Identifying parts of a computer</li> <li>• Switching on and off the computer</li> <li>• Playing computer games</li> </ul>	<ul style="list-style-type: none"> <li>• Mouse</li> <li>• Screen</li> <li>• System Unit</li> <li>• Keyboard</li> <li>• Printer</li> </ul>
			<ul style="list-style-type: none"> <li>• Computer puzzles</li> <li>- Disjointed objects such as pictures and shapes</li> <li>- Blocks of different colours such as alphabets, numbers</li> </ul>	<ul style="list-style-type: none"> <li>• Identifying disjointed objects on a computer puzzle</li> <li>• Selecting parts of disjointed objects to make a whole</li> <li>• Playing games with blocks</li> <li>• Solving puzzles using shapes and colours: <ul style="list-style-type: none"> <li>- Zimbabwean flag</li> <li>- Map of Zimbabwe</li> </ul> </li> </ul>

## Information and Communication Technology (ICT)

TOPIC	OBJECTIVES Learners should be able to:	CONTENT/ COMPETENCIES	SUGGESTED ACTIVITIES AND NOTES	SUGGESTED RESOURCES
7.8 <b>APPLICATION SOFTWARE</b>	draw patterns and shapes	<ul style="list-style-type: none"> <li>• Drawing</li> </ul>	<ul style="list-style-type: none"> <li>• Drawing different patterns and shapes based on socio-cultural context</li> </ul>	<ul style="list-style-type: none"> <li>• ICT tools</li> </ul>
7.9 <b>SAFETY AND SECURITY</b>	<ul style="list-style-type: none"> <li>• play media files</li> <li>• retell folktales</li> <li>• record sounds and videos</li> </ul>	<ul style="list-style-type: none"> <li>• Multimedia - Educational cartoons based on folktales</li> </ul>	<ul style="list-style-type: none"> <li>• Playing media files using ICT tools</li> <li>• Conducting educational tours</li> <li>• Watching educational cartoons using ICT tools</li> <li>• Recording sounds and videos</li> </ul>	<ul style="list-style-type: none"> <li>• ICT tools</li> </ul>
7.10 <b>PROGRAMMING</b>	<ul style="list-style-type: none"> <li>• state computer safety rules</li> <li>• identify physical security requirements for ICT tools</li> </ul>	<ul style="list-style-type: none"> <li>• Basic computer safety rules</li> <li>-Computer security</li> </ul>	<ul style="list-style-type: none"> <li>• Stating computer safety rules</li> <li>• Discussing computer safety rules</li> <li>• Discussing physical security requirements for ICT tools</li> </ul>	<ul style="list-style-type: none"> <li>• Charts and pictures showing computer safety rules</li> <li>• Pictures showing computer security</li> </ul>
	<ul style="list-style-type: none"> <li>• guide a floor robot in relation to other objects on a floor map</li> <li>• identify the different tasks that the robots can do</li> </ul>	<ul style="list-style-type: none"> <li>• Control -Robotics</li> </ul>	<ul style="list-style-type: none"> <li>• Visiting specific positions using a robot on a floor map related to other objects</li> <li>• Conducting educational tours</li> </ul>	<ul style="list-style-type: none"> <li>• Scratch Programming, Logo</li> <li>• ATM and automatic doors</li> </ul>

## Information and Communication Technology (ICT)

### COMPETENCY MATRIX GRADE 1

TOPIC	OBJECTIVES Learners should be able to:	CONTENT/ COMPETENCIES	SUGGESTED ACTIVITIES AND NOTES	SUGGESTED RESOURCES

## Information and Communication Technology (ICT)

# 8.0 ASSESSMENT

## 8.1 Assessment Objectives

### 8.1.1 Knowledge and Understanding

Learners should be able to:

- identify ICT tools in the environment
- recognise information in a variety of forms
- communicate using ICT tools
- incorporate ICT into other subjects
- present information in a variety of forms
- archive cultural information using ICT tools

### 8.1.2 Problem solving

Learners should be able to:

- create a computer project from a given problem statement
- give commands to control a device using ICT
- select and apply appropriate techniques and principles to develop data structures
- present information in a variety of forms
- implement data structures

### 8.1.3 Practical Skills

Learners should be able to:

- select and apply appropriate techniques and principles to develop data structures
- design and develop solutions to given problem
- create a computer project from a given problem statement

## 8.2 Scheme of Assessment

The ICT Syllabus for Infants embraces continuous assessment which is mainly formative in nature.

### Continuous Assessment (100%)

Profiling and practical assignments are administered on learners from ECD through to Grade 2, while tests start at Grade 1. Tests and assignments are designed by the class teacher. Assessment instruments like checklists and observation schedules must go through national standardisation.

**NB: Assessment through practical assignments and tests may not contribute to the final mark. Profiling should continue through to Grade 7.**

***Assessment Table***

LEVEL	FORM OF ASSESSMENT	ASSESSMENT TASK	NATURE OF ASSESSMENT TASK	FREQUENCY
ECD	Continuous	<ul style="list-style-type: none"> <li>• Scribbling</li> <li>• Painting</li> <li>• Colouring</li> <li>• Gaming</li> <li>• Audio and video recording</li> <li>• Photographing</li> <li>• Solving puzzles</li> </ul>	<ul style="list-style-type: none"> <li>• Practical exercises</li> </ul>	<ul style="list-style-type: none"> <li>• Regularly</li> </ul>
GRADE 1	Continuous	<ul style="list-style-type: none"> <li>• Drawing</li> <li>• Painting</li> <li>• Colouring</li> <li>• Gaming</li> <li>• Audio and video recording</li> <li>• Photographing</li> <li>• Solving puzzles</li> <li>• Typing</li> </ul>	<ul style="list-style-type: none"> <li>• Practical and written exercises</li> </ul>	<ul style="list-style-type: none"> <li>• Fortnightly and monthly</li> </ul>
GRADE 2	Continuous	<ul style="list-style-type: none"> <li>• Drawing</li> <li>• Painting</li> <li>• Colouring</li> <li>• Gaming</li> <li>• Audio and video recording</li> <li>• Photographing</li> <li>• Solving puzzles</li> <li>• Typing</li> </ul>	<ul style="list-style-type: none"> <li>• Practical and written exercises</li> </ul>	<ul style="list-style-type: none"> <li>• Fortnightly and monthly</li> </ul>

**NB:** Practical exercises can be done individually or in groups

## Information and Communication Technology (ICT)

### ***Assessment Criteria***

Assessment Instruments:

- Checklists
- Rating Scale
- Observation Guide
- Exercises
- Theory Tests
- Practical Tests

## Information and Communication Technology (ICT)

---

### 9.0 APPENDICES

#### APPENDIX I: GLOSSARY OF TERMS USED IN QUESTION PAPERS

It is hoped that the glossary will be helpful to learners as a guide. The glossary has been deliberately kept brief not only with respect to the number of terms included but also to the descriptions of their meanings. Learners should appreciate that the meaning of a term must depend in part on its context.

- |                         |  |
|-------------------------|--|
| <b>1 Define</b>         | is intended literally, only a formal statement or equivalent paraphrases being required.   |
| <b>2 State</b>          | implies a concise answer with little or no supporting argument e.g. numerical answer that can readily be obtained by inspection                                |
| <b>3 List</b>           | requires a number of points generally each of one word with no elaboration, where a number of points is specified this should not be exceeded.                 |
| <b>4 Explain</b>        | may imply reasoning or some reference to theory depending on the context   |
| <b>5 Describe</b>       | requires the candidate to state in words (using diagrams where appropriate) the main points of the concept   |
| <b>6 Outline</b>        | implies brevity that is restricting the answer to given essentials   |
| <b>7 Predict/deduce</b> | the candidate is expected to produce the expected answer by making a logical connection between other pieces of information                                    |
| <b>8 Suggest</b>        | it is used in two main contexts that is either to imply that there is no unique answer or to imply that learners are expected to apply their general knowledge |
| <b>9 Find</b>           | is a general term that may variously be interpreted as calculate, measure, determine etc   |
| <b>10 Determine</b>     | often implies that the quantity concerned cannot be measured directly but is obtained by calculation   |

#### APPENDIX II: ACRONYMS

<b>ATM</b>	Automated Teller Machine
<b>CDs</b>	Compact Disks
